

The City of Overland Park
Stop Loss Request for Proposal
Q&As

October 10, 2019

***Q:** The large claim information I have for the current year provides condition categories. Can you provide a report with diagnosis for each claimant meeting 50% of the specific deductible for review?*

A: Please see attached*

***Q:** Are you able to provide September data when it becomes available?*

A: Yes, however, we ask that all bidders return a preliminary quote (with data through August) by the initial due date of October 15th. September data should be available no later than October 20th. Mercer will deliver this data to all known, participating bidders on that date to “firm up” quotes, as applicable. To avoid altering the timeline in any way, we ask that any revised quotes be delivered no later than October 23rd, in order to allow Mercer and the City time to analyze the information and determine recommendations for the City’s FAED committee.

***New bidders only:** To receive utilization reports, please contact Sara Haynes at sara.haynes@mercerc.com or Tricia Iseman at tricia.iseyman@mercerc.com.
